12. ECOLOGICAL INFORMATION

Component Summary

2-Propanol

Fish low toxicity: LC/EC/IC50 > 100 mg/l

1-METHOXY-2-Propanol

Fish low toxicity: LC/EC/IC50 > 1000 mg/l

PREPARATION SUMMARY

- Ecotoxicity:** This preparation is highly soluble in water. Limited toxicity tests and models indicate this preparation should exhibit low toxicity to aquatic organisms.
- Environmental Fate:** This preparation will biodegrade relatively rapidly in both soil and water, and will not persist in the environment. Due care should be taken to avoid accidental releases to aquatic or terrestrial systems.
- Bioaccumulation:** Because of this preparation's high solubility and rapid biodegradability, it is unlikely that bioaccumulation will occur in aquatic or terrestrial systems. Models estimate that this material will preferentially partition to water versus air or soil. Based on available information, this preparation is not expected to produce any significant adverse environmental effects, when used as directed.
