11. TOXICOLOGICAL INFORMATION

COMPONENT SUMMARY

2-butoxyethanol

LD₅₀: (Oral) Rat 470 MG/KG

ACUTE INHALATION EFFECTS:

Short term exposure to high concentrations of vapors (300 - 600 PPM) can cause respiratory and eye irritation, CNS depression, and possible damage to kidney and liver.

ACUTE ORAL EFFECTS:

The major toxic effect in acute and sub-chronic animal studies was intra-vascular red cell hemolysis (destruction). This was often associated with secondary effects such as spleen and liver enlargement and nephropathy. Studies show that hemolysis and secondary effects are not relevant to humans.

SKIN EFFECTS: This substance is a mild skin irritant.

EYE EFFECTS: This product is expected to be an eye irritant.

Repeated Dose Toxicity:

Administration of 2-butoxyethanol to rats (855 mg/kg/day) and mice (1000 mg/kg/day) for periods of 5-6 weeks showed no effects on the testes. NTP reported testicular weight changes in rats and mice ingesting up to 6000 PPM (443 and 694 mg/kg/day in rats and mice) of 2-butoxyethanol in a 13 week drinking water study. No chemically related microscopic lesions were seen.

PRODUCT NAME: LASERSHOT Spray & Wipe Degreaser**CARCINOGENICITY:**

Not expected to occur.

2-Aminoethanol

2-Aminoethanol is a severe eye irritant and a skin irritant. Chronic exposure can cause irritant or allergic contact dermatitis, occupational asthma and possibly liver damage. 2-Aminoethanol was teratogenic in rats exposed by the oral route at high doses, but was not teratogenic or fetotoxic in rats or rabbits exposed dermally. It is in Class B (few reproductive effects in animals but no human data) for reproductive hazard. The actual human reproductive hazard is unknown.

LD₅₀: (Oral) Rat 1200 MG/KG

ACUTE INHALATION EFFECTS:

Prolonged and repeated exposure to vapors may cause damage to the CNS, lungs and kidneys.

ACUTE ORAL EFFECTS:

May cause CNS depression, gastrointestinal tract, liver and kidney damage.

Repeated Dose Toxicity:

Chronic occupational exposure reportedly was associated with chronic bronchitis, liver damage, weakness and fatigue. Occupational asthma has also been reported with chronic exposure. Rats chronically exposed had degenerative changes in the liver, heart and lungs.

CARCINOGENICITY:

At the time of this review, no studies were found on the possible carcinogenic activity of this material in humans or experimental animals.

12. ECOLOGICAL INFORMATION

PRODUCT NAME: LASERSHOT Spray & Wipe Degreaser

COMPONENT SUMMARY

2-Aminoethanol

Fathead minnow; 96hr; LC50 = 206 mg/l

Amines, C12-18-alkyldimethyl, N-oxides

Aquatic Toxicity: fish, CL50: <1 mg/l

Also poisonous for fish and plankton in water bodies.

2-butoxyethanol

Fathead minnow LC50 = 1900 mg/l

PREPARATION SUMMARY

Ecotoxicity: These materials are highly soluble in water. Limited toxicity tests and models indicate these materials should exhibit low toxicity to aquatic organisms.

Environmental Fate: These materials will biodegrade relatively rapidly in both soil and water, and will not persist in the environment. Due care should be taken to avoid accidental releases to aquatic or terrestrial systems.

Bioaccumulation: Because of these materials' high solubility and rapid biodegradability, it is unlikely that bioaccumulation will occur in aquatic or terrestrial systems. Models estimate that these materials will preferentially partition to water versus air or soil. On the basis of available information, this material is not expected to produce any significant adverse environmental effects, when used as directed.
